

Internet Society AMS Chapter Portal Functionality (Summary)

Below is a functionality summary for the new ISOC AMS Chapter Portal, which is replacing the Q portal on October 29th. **NOTE:** Any items with asterisks (*) represent portal functionality offered with the current Q (GoMembers) portal – all other items represent new capabilities.

Member functionality

- Member self-signup for ISOC Global or Sustaining Membership *
- Member self-signup for multiple ISOC Chapters *
- Ability for members or other users to donate to ISOC *
- Self subscription management (subscribe/unsubscribe)
- Ability for members or other users to register for both ISOC and ISOC chapter meetings and events
- Ability for members to indicate interest in given topics
- Ability for member to edit his/her profile online
- Ability for member to store up to three mailing addresses and three email addresses, and to indicate preferred address for both
- Email address is now unique to ensure fewer duplicate records
- Portal now localised in English, French, German, and Spanish.

Chapter officer functionality

- Chapter "roster" or members list available to officers *
- Ability to export member lists directly to .csv file when required
- Chapters can more easily define who can use the portal – for instance, all chapter officers or just certain administrators
- Ability for officers to drill down to member profile and change (for example) member address or other contact information if required
- Chapter officer reviewing and approving Member application (no longer necessary for ISOC staff to approve chapter applicants)
- Ability for chapter officers to add members manually via the portal (and resulting real-time duplicate checking)
- Ability for officers to add multiple chapter members at one time via .csv file upload (ISOC Global Members are created simultaneously)
- Renewal of chapter memberships online
- Chapter officers able to create meetings or events for chapters via portal
- Reporting capability for chapters
- Ability for chapter officers to create email communications to members based on predefined templates
- Ability for selected chapter officers to manage other chapter officers (emergency delete, etc.) *
