

ISOC Internet of Things Special Interest Group (IoT SIG) Application

A. Proposed name of the SIG

Internet Society Internet of Things Special Interest Group (ISOC IoT SIG)

B. Community of interest the SIG will serve

SIG will serve the Internet Community within cross-region community, which will include specialists, academia, lecturers and students from Armenia, Belarus, Georgia, and Ukraine. SIG will be also open for the participants from other countries as well.

Thus, the ISOC IoT SIG will combine the research and practical interests of industry, academia and education.

Its need to stress that within this cross-regional community the idea on creating of IoT association long time has been living and discussed during a few regional forums.

C. Purpose and scope of the SIG

The ISOC IoT SIG is formed to achieve the following tasks:

- The developing, studying and researching of the effective and appropriate solutions to IoT security challenges that are well suited to the scale and complexity of the issues as matter of the collective obligation ensure;
- The developing, studying and researching of the individual privacy challenges across a broad spectrum of expectations, while still fostering innovation in new technology and services;
- The developing, studying and researching of the tasks for unique needs and challenges of implementation in less-developed regions will need to be addressed, including infrastructure readiness, market and investment incentives, technical skill requirements, and policy resources within facilitate information and technological development of the Internet;
- The studying of the legal, regulatory and associated policy issues connected with the rapid rate of change in IoT technology, which frequently can not to adapt to relevant modern situation on the market;
- To engage the youth, students, educational, universities community as well as within widest layers of Internet users for expanding knowledge, bringing extra-education, and giving practical skills work with RFC and best practices in Internet and to promote scientific, educational and cultural achievements;
- To encourage and reach cross regional and global community cooperation, global information networking, development of the information infrastructure in the society, implementation of advanced information technologies in organizations irrespective of their type of ownership;
- To facilitate development of legal measures, supporting Internet advancement, e.g. assist in drafting projects aimed at protecting information within the Internet;

- To provide assistance in legislative activities concerning communications, information and intellectual property, mass media;
- To assist in design, development and application of electronic communication means, to provide support to organizations, rendering communication services and information backing within the Internet network;
- To assist in protecting intellectual property rights within the Internet;
- To support projects, dedicated to development and distribution of mass media within the Internet;
- To facilitate application of Internet-based technologies for the cross regional and global community environment including support projects dedicated to development of the Internet network within educational community;
- To organize training, refreshing courses, skill upgrading undertakings in communications, law, computer sciences and information technologies for the cross regional and global community environment and with Partners from other Chapters and SIGs;
- To organize and run symposia, conferences, exhibitions, shows, festivals, presentations, auctions and other events, including those international by nature, incidental or conducive to any of the objectives of the SIG.

D. Outline of key priorities for the first year of the SIG

- Studying and researching best practices regarding smart cities, medical applications, agriculture;
- The popularization and public enlightenment within the newest trends in field of the IoT, IPv6, and newest data transfer protocols etc.;
- Formation the close business and research relations with vendors on national and cross regional markets;
- Presentation of the results of the work for in-depth discussion at conferences, forums, seminars;
- Help and activity on practical of implementation students' projects and startups;
- Developing conditions for creating of extra-education and practical platforms for students.

E. Founding members of the SIG

#	Name, Surname	Position, Address
1.	Aleksandr Palamarchuk	student of department of Computer science of State University of Telecommunications, Solomenska str., 7, Kiev, Ukraine, http://foreign.dut.edu.ua/ , wvt-101@ukr.net
2.	Alena Belskaya	Marketing Specialist, Reliable Software, Ltd., 57, Dzerzhinskogo Ave., 8th floor, office 38-2, Minsk, Belarus, 220089, +375293239817, ab@hoster.by
3.	Alik Abrahamyan	Head of Business Development and Marketing, Aranea

		LLC, Str. Paronyan 5, Taperakan, Ararat region, Armenia a.abrahamyan@aranea.am
4.	Anahit Avetisyan	Customer Support Offices, EKENG CJSC, 4 Tigran Mets street, +37491208214, Anahit.avetisyan@ekeng.am, www.ekeng.am
5.	Andranik Avetisyan	Head of IT Department, Aranea LLC, str. Shahumyan, bulid.6, apt.1, Ararat, Ararat region, Armenia, a.avetisyan@aranea.am, +37455444920,
6.	Andranik Minasyan	Director, Aranea LLC, Isahakyan 32/1, Ararat, Ararat region, Armenia, +37455111115, aranea@aranea.am
7.	Andrey Kosarevski	CEO, Cloud Hosting, Ltd., 57, Dzerzhinskogo Ave., 9th floor, office 42-2, Minsk, Belarus, 220089, +375(29)331-08-90, a@hoster.by
8.	Andrey Kovalenko	student of department of Computer science of State University of Telecommunications, Solomenska str., 7, Kiev, Ukraine, http://foreign.dut.edu.ua/, 3evolution3@mail.ru
9.	Andriy Kysil	student of department of Computer science of State University of Telecommunications, Solomenska str., 7, Kiev, Ukraine, http://foreign.dut.edu.ua/, kisil19999@mail.ru

G. Membership

We'll involve new members and volunteers to SIG via ISOC website and events of ISOC IoT SIG and Supporting organizations.

We'll plan to communicate, interact and involve the new potential members of the proposed SIG using platform, possibilities and means of regional workshops, seminars of the RIPE, ICANN, IGF, IETF etc. events including as well as direct and remote participation

We'll plan creating cross regional web-site with supporting of different languages.

H. Additional information

There are no any special requirements and regulations checked in accordance with national legislations of Armenia, Belarus, Georgia, and Ukraine.

Participants in the prospective ISOC IoT SIG community understand and agree that at first stages the full-time and close common participation of representatives of different countries is impossible due to geographical reasons.

Participants reached a preliminary agreement that working discussions, sessions, seminars, workshops etc. can initiate by representatives of any country.

In this case, an agreement has been reached for all parties that the other members on an equal rights take remote participation by the Internet means.

Taking in account existing differences between national legislations, prospective participants reached on compliance principles of the future activities in accordance with the rules and provisions of ISOC By-Laws.
